-!- FUNCTION: THE SHORT FORM (VARIANT A) MAY ACT TO TRANSPORT LEPTIN

TO THE CEREBROSPINAL FLUID. THE PUTATIVE SOLUBLE RECEPTOR (VARIANT

E) COULD FUNCTION AS A TRANSPORT PROTEIN.

-!- SUBCELLULAR LOCATION: TYPE I MEMBRANE PROTEIN. EXCEPT FOR FORM E
WHICH COULD BE SECRETED.

-!- ALTERNATIVE PRODUCTS: 5 ISOFORMS; A, B (SHOWN HERE), C, D AND E;
ARE PRODUCED BY ALTERNATIVE SPLICING.

-!- TISSUE SPECIFICITY: (1) VARIANT A: HIGHEST LEVEL OF EXPRESSION IN
LUNG AND KIDNEY, ALSO PRESENT IN CHOROID PLEXUS AND HYPOTHALAMUS.

(2) VARIANT B: HIGHEST LEVEL OF EXPRESSION IN HYPOTHALAMUS AND
LOWER LEVEL IN BRAIN, TESTES AND ADIPOSE TISSUE. (3) VARIANT E:
EXPRESSED IN ADIPOSE TISSUE, HYPOTHALAMUS, HEART, AND TESTES.

-!- SIMILARITY: CONTAINS 3 FIBRONECTIN TYPE III-LIKE DOMAINS.

-!- SIMILARITY: BELONGS TO THE CYTOKINE FAMILY OF RECEPTORS.
                                                                                                                                                                                                                                                     EXPRESSION IN

I. FUNCTION: SIGNAL-TRANSDUCING MOLECULE. THE RECEPTOR SYSTEMS FOR IL-6, LIF, OSM, ONTF, AND IL-11 CAN UTILIZE GPl30 FOR INITIATING SIGNAL TRANSDUCES THE SIGNAL. DOES NOT BIND IL-6. MAY HAVE A ROLE IN EMBRYONIC DEVELOPMENT.

C. I. SUBCELLULAR LOCATION: Type I membrane protein.

C. I. SUBCELLULAR LOCATION: Type I membrane protein.

C. I. SUBCELLULAR LOCATION: Type I membrane protein.

C. I. SUBCELLULAR LOCATION: TISSUES SUCH AS BRAIN, HEART, THYMUS, SPLEEN, KIDNEY, LUNG AND LIVER. FOUND IN ALL THE CELL LINES TESTED EXCEPT BAF-B03. EXPRESSION NOT RESTRICTED TO IL-6-RESPONSIVE CELLS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1019

Leukemia inhibitory factor receptor is structurally related to the in-

T.E.6 signal transducer, gpl30.";

EMBO J. 10:2839-2848(1991).

- I- FUNCTION: SIGNAL-TRANSDUCING MOLECULE. MAY HAVE A COMMON PATHWAY WITH GPl30. THE SOLUBLE FORM INHIBITS THE BIOLOGICAL ACTIVITY OF LIFE SUBUNIT: HETERODIMER COMPOSED OF LIFER AND GPl30.

- I- SUBUNIT: HETERODIMER COMPOSED OF LIFER AND GPl30.

- I- SUBCELLULAR LOCATION: TYPE I MEMBRANE PROTEIN. THERE IS A MEMBRANE-BOUND AND A SECRETED FORM.

- COURTINE BY ALTERNATIVE SPLICING.

- I- SIMILARITY: CONTAINS 1 IMMUNOGLOBULIN-LIKE C2-TYPE DOMAIN.

- I- SIMILARITY: CONTAINS 4 FIBRONECTIN TYPE III-LIKE DOMAINS.

- I- SIMILARITY: BELONGS TO THE CYTOKINE FAMILY OF RECEPTORS.
                                                                                                                                                                                                                                                                                                                                                                                                         1054

"Identification of a ligand-binding site on the granulocyte colony-stimulating factor receptor by molecular modeling and mutagenesis.";
J. Biol. Chem. 272:29735-29741(1997).

-!- FUNCTION: RECEPTOR FOR GRANULOCYTE COLONY-STIMULATING FACTOR (G-CSF). IN ADDITION IT MAY FUNCTION IN SOME ADHESION OR RECOGNITION
EVENTS AT THE CELL SURFACE.

-!- SUBUNIT: DIMER (PROBABLE).
-!- SUBCELLULAR LOCATION: TYPE I MEMBRANE PROTEIN, THE GCSFR-2 FORM,
WHICH LACKS THE TRANSMEMBRANE DOMAIN, MAY REPRESENT A SOLUBLE FORM
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         -!- TISSUE SPECIFICITY: ONE OR SEVERAL FORMS HAVE BEEN FOUND IN
WYELOGENOUS LEUKEMIA CELL LINE KG-1, LEUKEMIA U937 CELL LINE, IN
BONE MARROW CELLS, PLACENTA, AND PERIPHERAL BLOOD GRANULOCYTES.
THE GCSFR-2 FORM HAS BEEN FOUND ONLY IN LEUKEMIA U937 CELLS. THE
GSCFR-3 FORM IS HIGHLY EXPRESSED IN PLACENTA.
-!- DISEASE: DEFECTS IN CSF3R ARE A CAUSE OF KOSTMANN SYNDROME;
ALSO KNOWN AS SEVERE CONGENITAL NEUTROPENIA (SCN).
-!- SIMILARITY: CONTAINS 5 FIBRONECTIN TYPE III-LIKE DOMAINS.
-!- SIMILARITY: BELONGS TO THE CYTOKINE FAMILY OF RECEPTORS.
-!- DATABASE: NAME-PROW; NOTE-CD guide CD114 entry;
WWW-"http://www.ncbi.nlm.nih.gov/prow/cd/cd114.htm".
                                                                   colony-stimulating
                                                                                                                                                                                                                                                                                                                                                                                                                                              MEDLINE-97331327; PubMed-9187659; MEDLINE-97331327; PubMed-9187659; MEDLINE-97331327; PubMed-9187659; Vamasaki K., Naito S., Anaguchi H., Ohkubo T., Ota Y.; Solution structure of an extracellular domain containing the WSXWS motif of the granulocyte colony-stimulating factor receptor and its interaction with ligand."; Nat. Struct. Biol. 4:498-503(1997).

"Three different cDNAs encoding mouse D-factor/LIF receptor.";

J. Biochem. 115:557-562(1994).

-!- FUNCTION: SIGNAL-TRANSDUCING MOLECULE. MAY HAVE A COMMON PATHWAY WITH GP130. THE SOLUBLE FORM INHIBITS THE BIOLOGICAL ACTIVITY OF LIF BY BLOCKING ITS BINDING TO RECEPTORS ON TARGET CELLS.

-!- SUBUNIT: HETERODIMER COMPOSED OF LIFR AND GP130.

-!- SUBCELLULAR LOCATION: TYPE I MEMBRANE PROTEIN. THERE IS A MEMBRANE-BOUND AND A SECRETED FORM.

-!- ALTERNATIVE PRODUCTS: THE SECRETED AND THE MEMBRANE-BOUND FORMS MAY ARISE BY ALTERNATIVE SPLICING.

-!- TISSUE SPECIFICITY: PLACENTA, LIVER, KIDNEY, HEART, LUNG, BRAIN, AND EMBRYOS. THE LIVER MAY BE THE PRIMARY SITE OF SYNTHESIS OF THE SECRETED FORM.

-!- SIMILARITY: CONTAINS 1 IMMUNOGLOBULIN-LIKE C2-TYPE DOMAIN.

-!- SIMILARITY: CONTAINS 4 FIBRONECTIN TYPE III-LIKE DOMAINS.

-!- SIMILARITY: BELONGS TO THE CYTOKINE FAMILY OF RECEPTORS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               --TAK---LNDTLLMC--LKITSGGVIFQSP- 225
